

Partnership in alloys

Copper based master alloys

Copper

- Saving time and money*
- | | |
|---|---|
| Copper-Aluminium 10%, 50%, 60%, 70%, 75%, 80% | Copper-Manganese 20%, 30%, 50% |
| Copper-Aluminium-Boron | Copper-Manganese-Iron |
| Copper-Antimony 50% | Copper-Manganese-Nickel |
| Copper-Arsenic 20%, 30% | Copper-Manganese-Phosphorus |
| Copper-Bismuth 25% | Copper-Manganese-Silicon |
| Copper-Boron 2% | Copper-Nickel / Cupro Nickel (various compositions) |
| Copper-Cadmium 50% | Copper-Silicon 10%, 15%, 20%, 30% |
| Copper-Calcium 5%, 10% | Copper-Silver 10%, 25%, 30% |
| Copper-Cerium(MM) 10% | Copper-Tellurium 50%, 82% |
| Copper-Chromium 5%, 10% | Copper-Tin (various compositions) |
| Copper-Cobalt 10%, 15%, 20%, 50% | Copper-Titanium 30%, 50% |
| Copper-Iron 10%, 15%, 20%, 25%, 30%, 50% | Copper-Vanadium 1% |
| Copper-Iron-Aluminium | Copper-Zinc (various compositions) |
| Copper-Lithium 2% | Copper-Zirconium 10%, 33%, 50% |
| Copper-Magnesium 10%, 15%, 20%, 35%, 40%, 50% | Deoxidised High Phosphorus Copper |

Physical form: ingots, waffle plates, lumps, powder.
